Date: 5. October

Max persons: 53

Time: Departure at 16:00

Return: 19.00 at the Blue lagoon

The tour

Aurora Basecamp – Northern Lights Observatory is a one-of-a-kind facility, offering guests the chance to experience a real-time, indoor simulation of the Northern Lights, in a warm and relaxing environment.

The Aurora Lounge is the heart of Aurora Basecamp. Inside the 150 sqm geodesic dome you can relax, have some refreshments and chat with the Aurora Basecamp guides that are happy to tell you all there is to know about the Northern lights. After having experienced the Northern Lights we make our way south to experience the geothermal landscapes at Seltún. We will end our day at the world famous Blue Lagoon where you will have the opportunity to take a dip before the Get-To-Gether.

Prepare for the tour: Dress according to weather, sturdy shoes and a hat is always a good choice for Icelandic nature. Bring swimsuit for the chance to dip your toes in the milky blue waters at the Blue Lagoon.
